

Dear FCC,

I am a subscriber to XM radio and recently NAB's petition 04-160 has come to my attention. I live in an area where there is a limited and often times poor quality of radion reception therefore I find in necessary to pay for satallite service. I feel it would be unjust to limit my access to traffic & weather information and am asking that you reject petition 04-160 so I other subscribers who pay for the convience of satalite radio can continue to receive the services we have grown to count on.

Respectfully,

Janet Gassaway
